SHASHANK ML

IT Professional | Java & Python | SQL & MySQL | IT Infrastructure | Machine Learning | Open to Relocation

☎ 73490 26155 ✉ shashankml3112@gmail.com in linkedin.com/in/shashank-ml-a5658927a

SUMMARY

Detail-oriented MCA graduate combining full-stack development (Java, Spring Boot, SQL/MySQL), Python-based application development, IT infrastructure management, and machine learning into a versatile technical profile suited for global service delivery and client-facing engineering roles. Built a complete e-commerce platform (BuyNGo) using Java/Spring Boot with MVC architecture, developed ML models (KNN, Decision Tree) for a stress-prediction system, and built a rule-based AI chatbot application in Python. Currently leading IT operations across two branches of a healthcare organization — managing infrastructure, vendor relationships, a 6–7 person team, and cross-functional coordination, developing strong ownership, communication, and stakeholder-management skills valued in enterprise and multinational environments. Comfortable working in structured SDLC processes, cross-functional teams, and fast-paced operational settings; open to relocation and onsite assignments.

SKILLS

Programming & Frameworks: Core Java, Python, Spring Boot, JavaScript, HTML, CSS, MVC Architecture, OOP Concepts

Databases: SQL, MySQL, MySQL Workbench, SQL Server

Machine Learning & Analytics: Data Preprocessing, Model Development, Model Training, Hyperparameter Tuning, Model Evaluation, KNN, Decision Tree

Tools & Concepts: Apache Tomcat, MS Excel, Requirements Analysis, SDLC Concepts, Debugging, Software Troubleshooting, Process Improvement

IT & Systems Support: Hardware/Software Troubleshooting, System Administration, Networking Basics, End-User Technical Support

Professional Skills: Client & Stakeholder Coordination, Team Management, Vendor Management, Cross-Functional Collaboration, Adaptability

PROJECTS

BuyNGo – E-Commerce Website (Java, Spring Boot, MySQL)

- Developed a full-stack e-commerce platform with customer, seller, and admin roles, following MVC architecture.
- Implemented OTP-based email verification for secure user registration and login.
- Built product browsing, cart management, and checkout with an order confirmation flow.
- Created a seller dashboard for adding/editing product listings, with an admin approval workflow before products go live.
- Built using Java (Spring Boot) for the backend, MySQL for data storage, and HTML/CSS/JavaScript for the frontend.

IT Employee Stress Detection Using ML Algorithms

- Built a machine learning system to predict IT employee stress levels and recommend personalized solutions.
- Implemented KNN and Decision Tree algorithms for stress classification, comparing accuracy across models.
- Designed admin and user modules for dataset management, stress prediction, and result visualization (pie/line charts).
- Built using ASP.NET (Visual Studio) with SQL Server as the backend.

AI Chatbot Application (Python)

- Built a rule-based chatbot application using Python, implementing keyword-matching and conditional logic to handle user queries.
- Designed conversation flow logic to map user input patterns to appropriate predefined responses.
- Developed and tested the chatbot as part of an academic project, strengthening Python programming and logic-building skills.

EXPERIENCE

IT Head

Jul 2026 - Present

Dr Heal Pain Cure Hospital

- Lead end-to-end IT operations across both hospital branches, overseeing infrastructure, systems, and network reliability.
- Coordinate software integration across desktop and laptop environments, along with task allocation within the team.
- Conducted a technical review of a third-party hospital website, delivering actionable recommendations for improvement.
- Drive procurement decisions for software and hardware assets, optimizing cost and vendor selection.
- Manage a team of 6–7 IT personnel sourced through external agencies, conducting performance evaluations.
- Implement antivirus protection and security protocols to safeguard confidential patient data.

Machine Learning Operations Intern

Jul 2025 - Oct 2025

Torus Solutions, Mysuru

- Built and optimized machine learning models for stress-level identification, contributing to a real-world, industry-grade mental health analysis application.
- Cleaned and prepared real-world datasets through feature engineering and preprocessing, improving model readiness and accuracy.
- Trained and fine-tuned multiple ML models, evaluating performance metrics to select the most reliable approach for deployment.
- Collaborated closely with developers and team members to integrate ML models into the broader application pipeline.
- Followed structured, version-controlled ML workflows to ensure reproducibility and smooth handoffs across the team.

EDUCATION

Master of Computer Applications (MCA)

Nov 2025

City College, Jayanagar, Bangalore University, Bengaluru, Karnataka

Bachelor of Computer Applications (BCA)

Sep 2023

Vidyavahini First Grade College, Tumkur University, Tumkur, Karnataka

CERTIFICATIONS

- Java Programming Certification — CodeSoft
- Core Java & SQL Professional Training — JSpiders
- Data Analytics, Data Science & AI/ML Training Program — Advanced Educational Services (AES)
